## PROJECTS

---

**"Lo-Key" - An Application to Discover the Undiscovered**

- Used a Model View Client .NET framework, and created a C# back-end web application that utilizes Spotify's Developer API to help users find similar yet under-represented musical artists with lower followings
- Analyzing Spotify's extensive data on track metrics such as *liveness*, *energy*, *danceability*, *instrumentalness*, and *speechiness*, Lo-Key uses a breadth-first search algorithm to assign a similarity value between a relatively popular artist and it's corresponding lists of similar-sounding yet lesser known artists
